

SECTION 31 23 16**EXCAVATION**

Last Update: March 3, 2014

Except where changes have been made below, reference APWA Utah Standard Specification Section 31 23 16 EXCAVATION.

General modification: Any location within the specification where OWNER is mentioned replace with DISTRICT.

General modification: Any location within the specification where ENGINEER is mentioned it should be noted that depending on the project or encroachment application the ENGINEER may be a DISTRICT employee.

Add the following to Section 1.1:

- C. Requirements for potholing or test excavations on District lands or interest in lands.

Add the following to Section 1.3:

- F. Excavated materials must not be stockpiled on buried pipelines or infrastructure unless adequate provisions are taken to ensure the protection of said pipelines or infrastructure.

Add paragraphs 3.2 G. - H. to Part 3:

- G. Prior to final design of any improvement that encroaches within Aqueduct Corridors, an excavation must be made to determine the location and depth of existing DISTRICT facilities. Any such excavation must be made only in the presence of authorized DISTRICT personnel.
- H. For specific requirements regarding notification to DISTRICT prior to performing test excavations and/or potholing, refer to coordination requirements, Section 01 31 13.
- I. CONTRACTOR shall inform DISTRICT of all encountered utilities during excavations.
